

1982
Foundation of Metsan

Origins of Metsan relies on mould production. It is the mould technology and knowledge we have that enables us today a wide range of products and fast prototype manufacture. First rule to exist long years in lighting industry is to dominate the mould. We began producing mould in a 50m2 workshop in 1982. The turning machine that we made our first moulds at is now resting in the factory.

1990
First Export Products

Russia turned into a grand market as a result of the collapse of the Eastern Bloc. Our country has become a major industrial production line with regard to both geographical proximity and production capacity. Meanwhile, Metsan carried out the very first exportation to Russia. By means of export, Metsan obtained not only a producer identity, but also an identity of an exporter. Production aimed at exportation revealed considerable progress in product range and quality improvements.

2014
New Investment for Technology Machines

Technological improvements were achieved with investments for new machinery. The range of products was broadened and quality enhanced with the purchase of CNC, Aluminum and Zamak Injection machinery. European countries were added to our export locations; Europe's major hotels and shopping plazas were illuminated with Metsan products.

1987
First Lighting Product

Metsan which has been manufacturing moulds for leading actors in the sector made a strategic business decision in 1987 and took the first step in lighting industry with initial 12x50 Pluton Series. There was an increasing demand for halogen spots in pluton style. Hence entering into the sector by this group was the most convenient option. We brought halogen products out which attained high demand owing to our broad knowledge and ingenuity. Metsan succeeded in composing Pluton product group and consequently gave up manufacturing mould for the market and began to exploit the mould room merely to develop its own products.

2012
Metsan Started for Changing Corporate Identity

As the brand familiarity ascended, practices began to redesign the corporate identity. It was a turning point for Metsan on the way to branding. Investing in the brand enhances the quality perception among the other players and builds mutual trust. Today, Metsan proceeds rapidly with its 170 employees on a 15000 m2 closed space by a product range over 3500 exported to 30 countries.

2018
Modernized LED Products and Sales Strategy

We have added new 5000 m² place to our existing factory. We have been growing up with our values and passions. If you have been looking for professional lightning center, then welcome to our team.
